Challenges in Hospitality & Clubs

- Patients feel lonely
 - Most sick patients feel lonely and prefer to be touch with their family members all time. But hospitals cannot entertain this due to health and safety reasons.
- Large visitors and maintenance after visiting hours
 - Friends and relatives like to visit admitted patients, but visitors are tough to handle from management view.
- Patient's attenders find difficult to pass time
 - Attenders are forced to stay with patient without any productivity.
- People hate to wait or sit idle
 - Waiting is unavoidable in hospitals especially in out-patient sections, they look for ways to entertain themselves and engage in productive works.

Why Shining Bot ...

How we address the challenges

Enables patients to be in touch with others

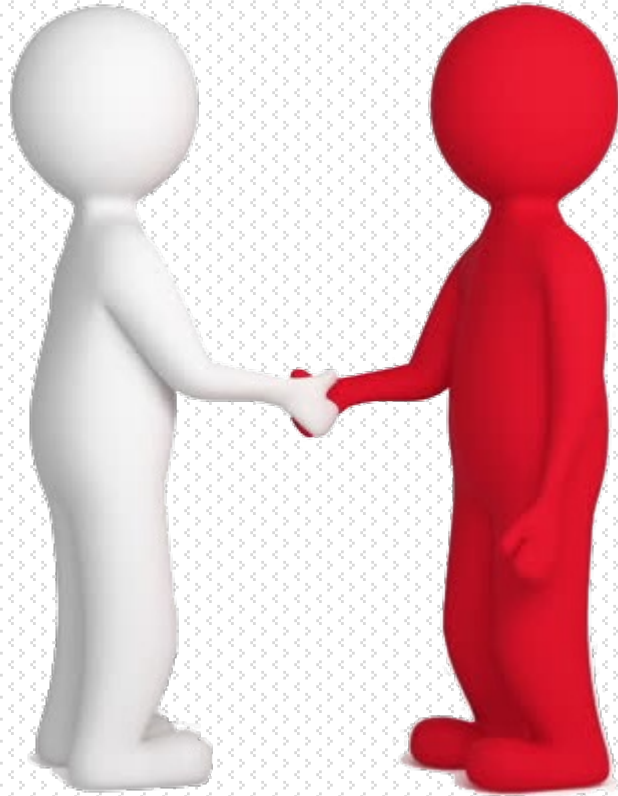

- ShiningBot offers WiFi Service

- Patients can be in touch with others using their mobile devices
- Many hospitals helped COVID patients to be in touch with their family during their tough time using this technology
- Hospitals provided Tablets in the in-patient wards and shared the Video Conference App ID to their family members for easy access
- Patients can use internet service to access their preferred television channels and continue to enjoy their shows
- Employees can use Internet to remotely work
- Helps hospital to avoid visitors

Attendees can use their time productively

- Many organization allow their employees to work remotely. Using WiFi attendees can work while they stay with patients
- High-Speed WiFi service is sold in many hospitals at attracts additional revenue to hospital
- Internet allows people to communicate and be in touch with others
- Many Online and OTT platforms can be used for additional entertainment / time pass.

People hate to wait / sit - idle

- Generally, people hate to wait, if WiFi is available many people do not mind waiting as they can spend time in their preferred manner
- WiFi registration process can also be used to provide token system to prioritise the visits
- ShiningBot can also help to send reminders to patient regarding their next visit
- ShiningBot can automatically track the visiting pattern and reminders can be send to no-show patients
